

RESOLUTION of the Eastern Partnership Civil Society Forum to eliminate barriers and work on accessibility for people with and without disabilities

The Civil Society Forum of the Eastern Partnership resolves to eliminate barriers and to work for accessibility for people with and without disabilities. The framework for this is the UN convention on the rights of people with disabilities.

An exchange of experience on the realization of the UN Human Rights Disability Convention should become a firm and permanent part of the working plans of the Forum.

Activities within the Forum should take place with the active participation and inclusion of people with disabilities and their NGOs.

The EaP - CSF acknowledges that social rights are an important dimension to be addresses within its work. People with disabilities, marginalized groups (including vulnerable children) have the same rights and should be visible to policy makers.

Therefore we want a sub-group called “inclusion and social policy” is to be founded in Working Group 1
